Such occurrences as that on board this steamer are rare indeed. and hence the crow were uttorly unprepared to meet the noxious gases they encountered. It is to be hoped also that charterers will endeavour, as far an possible, not to load ships with damp cargo, as the official analysis showed that the poisonous air originated from the moist condition of the pepper and mangrove bark shipped. The case is one that cannot be too widely made known.

Many boxes of letters are received at the Post Office not sealed, that is to say, the box is fastened with sealing wax, but there is no impression of a seal. The attention of boxholders is called to the ARNHOLD, KARBERG & Co. necessity of carefully sealing such boxes with some recognisable seal, and of sending a chit-
